Contact: gro.tiyy@yiit.org +905365883322
Address: Eminbey Cd. Badem St. B2/D17 Acıbadem, Istanbul Turkey
Age: 22
Languages: English (Fluent), Swedish (Beginner), Turkish (Native)

--- Education

- Mälardalen University (Västerås/Sweden) Exchange Student - Computer Science
- Isik University (Istanbul / Turkey) Computer Engineering

--- Teaching Experiences

- **Web development and Django**
I am currently teaching basics of web development and Django framework to students (freshmans and sophomores) in our university. We are forcing them to install Ubuntu on their machines and use Subversion & Trac.

--- Work Experiences

- **Mageroya:** Co-Founder (Current)
I am the co-founder of startup company Mageroya. It aims to build web based applications on top of free software solutions. (*Django, Linode*)
- **Parkyeri:** Software Developer Internship (June 2008 - October 2008) parkyeri.com
Parkyeri is a free software supporter company with some unique job definitions like completely free-to-choose work hours, wages based on performance and open to everybody company meetings. Parkyeri was chosen the fastest growing Turkish firm and Europe's thirty-sixth by Deloitte in 2007.
I worked for Parkyeri for more than 3 months as an Intern in 2008. During this time, I have gained experience and knowledge about Virtualization Solutions, System Administration and Web Software Developing. (*bash, debian, linux-vserver, php, html, javascript*)
- **Overdose Caffeine:** Part Time Developer (2005 - 2009) odcaf.com
Overdose Caffeine is a game development company settled by three friends including me. We have developed games mostly with Flash and HTML + Javascript. By the end of 2008, we were creating advergaming for companies including Eti, which is one of the biggest food companies in Turkey.
- **Server for University clubs** (2008-...)
I am administrating the server for Isik University student clubs. There are more than 30 virtual hosts running on an Apache & MySQL environment.

--- Project Experiences

- **Accom**
I am the project leader for a project called Accom on Isik University. This project will be the central for students about their accommodation needs. This system will place students on rooms based on their preferences. Students will also be able to open tickets about any problems they are having with their rooms. (*Django, xmllib, Google Maps API*)

- **Apple vs Adobe** <http://www.applevsadobe.net>
 With one of my oldest friends, we have developed a website about the recent Apple vs Adobe debate where users can vote and add their comments. We used Google App Engine with Webapp Python Framework. After four days, it succeeded to gather more than two thousand votes and comments.
 (Python, Google App Engine, Webapp, Memcache, HTML, CSS, Javascript)
- **Battle Of Survival** <http://apps.facebook.com/spellcastersbos/>
 I worked as a server-side coder and database expert in the Facebook's first realtime multiplayer game BOS. This game was played by one thousand unique players per day. I was also responsible for the integration of our game to Facebook Platform.
 (PHP, MySQL, HTML, CSS, FBML, Facebook API, Paypal API)
- **Spellcasters** <http://www.thelastmage.com>
 Spellcasters is one of the first MMORPG games developed in Turkey. I worked five years in this project as a serverside programmer and a security expert. This game had more than ten thousand registered users.
- **Wordprexy.com** <http://www.wordprexy.com>
 I have developed a web service called Wordprexy in the same week when the leader Turkish ISP blocked internet access for Wordpress.com. This service was working as a proxy specialized for Wordpress.com hosted blogs. It was also blocked by Turk Telekom after a some weeks although it was filtering all prohibited content using clever™ techniques .
 (PHP, libcurl, HTML)
- **Firefox Add-On for Wordprexy.com**
 This a Firefox Add-on which makes the blocking of Wordpress.com obsolete by redirecting the request to Wordprexy.com. Users can visit Wordpress.com without notifying the block.
 (JavaScript, GreaseMonkey Compiler)
<https://addons.mozilla.org/en-US/firefox/addon/5704/>
- **Robocup**
 I worked as the lead developer for the Robocup project of our school. I have developed a computer program called MrMime, which allows our robots to mimic any previously recorded physical movement. (Qt, Python, PyQt)
- **yiit.org** <http://www.yiit.org>
 This is the blog I am writing for more than five years. I have developed several Wordpress themes for it by myself. (PHP, HTML, CSS)
- **Gerzekhaber.com** <http://www.gerzekhaber.com>
 It's an ironic web site where I publish fake news about recent topics.
- **Otostopcu.org** <http://www.otostopcu.org>
 This is a six year old website about the Hitchhiker's Guide to the Galaxy. I have developed it when I was learning HTML and PHP. It gets its design from the H2G2 movie.
- **GYBE.org**
 This was a blog about the Post Rock music genre and some music groups.
- **Road To Kingdom**
 This is a game we developed for the BigPoint Games Software Company imitating MyMiniCity.
 (PHP, mod_rewrite, MySQL, HTML, XML, CSS, RSS)

--- *Technology Experiences*

Programming Technologies

- Python (5/10)
- Django (6/10)
- Bash (5/10)
- C (5/10)
- xHTML (8/10)
- CSS (8/10)
- JavaScript (4/10)

Computer Technologies & Applications

- Linux (7/10) (Debian, Ubuntu, Arch Linux)
- Apache (3/10)
- TCP/IP (3/10)
- HTTP (3/10)
- Network Security (2/10)

I want to learn more about:

- Software Design
- Network / System Administration
- Network Security
- Mobile Software Development

--- *Seminars & Courses I've Participated*

- FOSDEM 2010
- GUADEC 2008
- CCNA 1 & CCNA 2
- Information Security and Certified Ethical Hacker course (Istanbul Bilgi University)

--- *Hobbies*

- I am very interested in Nature sports. I have camped several places, including a one week camping at the 700 kilometers north of the Arctic Circle. I have also seen the Aurora Borealis.
- I am interested in Improvisation & Theatre sports.
- I was the head of Isik University Computer Club for the year 2009-2010
- I was the head of Isik University Nature Sports Club for the year 2008-2009
- I was a board member for Role Playing Club on our University
- I am doing translations for open source projects (<https://launchpad.net/~yiit>)
- I was the Science & Technology editor for our university newspaper.
- I love tea. I drink it a lot.
